

Task 3: Objective: Create a single-page portfolio showcasing your work.

Instructions:

1. Create an HTML file named portfolio-single.html.
2. Use <div> for your name and a brief introduction.
3. Create sections for:
 - About Me: Brief bio and skills.
 - Portfolio: List of projects with images and descriptions.
 - Contact: Basic contact information or a form.
4. Use anchor links () for navigation between sections.

Outcome: Your single-page portfolio will effectively present your work and personal details.

=====

Task 4: Objective: Create a table to compare different products.

Instructions:

1. Create an HTML file named comparison.html.
2. Use <header> for the page title.
3. Create a <table> with the following:
 - <thead> for the column headings (e.g., Product Name, Features, Price)
 - <tbody> for rows comparing different products
4. Add <caption> to describe the purpose of the table and <tfoot> for summary or notes.

Outcome: Your page will include a comparison table for products with clear headings and rows.
